Drainage around your home

Home and Garden Bulletin No. 210

This new bulletin discusses drainage problems around the home, such as wet basements, periodic yard flooding, water ponds on lawns, and poor growth of trees, shrubs, and other plants. Such wetness is generally caused by flooding, springs and seeps, seasonal high water tables, or slow soil permeability.

FARMERS' BULLETINS

Growing raspberries. (F 2165) 14 p. 25¢.

This slight revision discusses the various aspects of growing raspberries, including main types and varieties, planting, cultivating, irrigating, training and pruning, harvesting, and control of insects and diseases.

HOME AND GARDEN BULLETINS

Better lawns, establishment, maintenance, renovation, lawn problems, grasses. (G 51) 30 p. 50¢.

This revision gives the reader sound beautification pointers for the lawn such as: construction of the lawn - how it is graded and drained, and how the seedbed is prepared; selection of grasses, and how and when they are planted; and maintenance, which includes fertilizing, mowing, watering, and controlling weeds, diseases, and insects.

How to buy eggs. (G 144) Folder. 25¢.

This revised bulletin explains the difference between grade and size and how to read the USDA shield on egg packages. It gives detailed information about grade and size, shows the relationship between size and price, and offers a number of suggestions for storing and using eggs.

NOTE: Single copies of publications other than those listed FOR SALE ONLY may be obtained free as long as the supply permits from the Office of Communication, U.S. Department of Agriculture, Washington, D.C. 20250. Prices are given for the con-

venience of persons desiring to purchase these publications in quantities and for those who make frequent purchases of government publications. Remittances should be sent to the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402, except as otherwise noted.

Growing gardenias. (G 152) 8 p. 25¢.

The gardenia is one of the most important of the cut flowers grown in the open ground in the South. It is widely used by florists, and possesses the ability to keep well in storage. This slight revision discusses the growing of gardenias outdoors, in greenhouses, and in the home.

Beekeeping for beginners. (G 158) 12 p. 30¢.

This slightly revised bulletin, prepared for the beginner, provides basic information on nearly every aspect of beekeeping. The life of the bee in relation to the hive, how he makes honey and wax, what bees need, the best sources of nectar, and the two strains most commonly kept. In more detail is a discussion of building a beehive, moving and managing a colony of bees, and dealing with stings.

Drainage around your home. (G 210) Folder. 25¢.

BULLETIN OF THE MONTH

Roses for the home
Home and Garden Bulletin No. 25

This revised bulletin describes the varieties of garden roses suitable for various kinds of home plantings. It discusses the selection of plants, culture, winter protection, and propagation, and includes information on control of diseases and insects.

NOTE: Single copies of publications other than those listed **FOR SALE ONLY** may be obtained free as long as the supply permits from the Office of Communication, U.S. Department of Agriculture, Washington, D.C. 20250. Prices are given for the convenience of persons desiring to purchase these publications in quantities and for those who make frequent purchases of government publications. Remittances should be sent to the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402, except as otherwise noted.

FARMERS' BULLETINS

Growing blackberries. (F 2160) 18 p. 35¢.

To get the greatest yield and longest productive life from the blackberry plantation, growers should choose types and varieties that are adapted to their areas, prepare the soil thoroughly, plant only highest quality stock, cultivate frequently, and apply fertilizer every year. This revised bulletin gives growers the information and instructions they need to carry out these practices.

Using phenoxy herbicides effectively. (F2183) 25 p. 35¢.

This slightly revised bulletin describes how plants react to the phenoxy herbicides and explains what is meant by salts and esters and "acid equivalent." It tells how to apply the herbicides, how to test the output of the sprayer, and how to clean spray equipment.

A table at the end of the bulletin lists the susceptibility of more than 300 common weeds to control by the five phenoxy herbicides.

Grasshopper control. (F2193) 8 p. 30¢.

This revised publication explains how grasshoppers may be controlled by applying insecticides, employing cultural measures, regrassing field margins, and irrigating crops. Insecticides from which farmers may choose are discussed, along with application procedures and dosages for use on crops.

Controlling tomato diseases. (F 2200) 12 p. 30¢.

This revised bulletin describes diseases that most commonly attack tomatoes, such as Fusarium Wilt, Verticillium Wilt, Early Blight, Late Blight, Bacterial Spot, Anthracnose, and Root Knot. Symptoms of each disease and the progress of the disease are discussed. Control measures such as planting of resistant varieties, application of fungicides, and rotation of crops are recommended.

Catfish farming. (F 2260) 21 p. 40¢.

Catfish farming is using water areas to produce crops of catfish by intensive management. This new bulletin tells how to produce profitable crops of channel catfish, blue catfish and white catfish in ponds, raceways, or cages. It explains or describes the essentials involved in fulfilling the requirements of this kind of farming—control of water supply and quality, spawning, hatching, feeding fish, and harvesting.

HOME AND GARDEN BULLETINS

Roses for the home. (G 25) 23 p. 30¢.

See Bulletin of the Month

How to make jellies, jams, and preserves at home. (G 56) 34 p. 45¢.

This revised bulletin tells how to make various kinds of jellies, jams, and preserves, with and without added pectin. It also includes recipes for marmalades and preserves made with no added pectin. This publication includes information on equipment and containers, making and storing jelled fruit products, packing, and sealing.

Growing flowering annuals. (G 91) 19 p. 35¢.

This revised bulletin contains very useful information on how to grow flowering annuals—how to select seed, prepare the soil, when to plant, and the various steps to take in the care and cultivation of the plant. Related information on cutting and drying flowers and on indoor cultivation is included.

Making cottage cheese at home. (G 129) 9 p. 30¢.

This revised bulletin provides homemakers with simple information on how to make large and small-curd cottage cheese from skim milk or reconstituted nonfat dry milk.

LEAFLETS

The house fly: How to control it. (L 390) 8 p. 25¢.

This revised publication presents the latest recommendations on controlling house flies in and around homes and on farms. It tells how to eliminate breeding places and apply sanitation measures to control the flies. Instructions are given on applying space sprays, poisoned baits, and paint-on baits.

Electric heating of hotbeds. (L 445) 8 p. 35¢.

This slight revision contains information about construction of electric hotbeds, installation of electric heating cables, and operations of bed.

For purchase information write to the Motion Picture Division, Office of Communication, U.S. Department of Agriculture, Washington, D.C. 20250.

Crew Boss. Color, released 1962, 35 minutes.

A fire control training film designed to assist in training forest fire crew bosses. It dramatizes a crew boss with a project work crew on their first shift on a fireline from which they emerge as a disciplined, high-moral team. A good fire camp, fireline practice, and the characteristics of a good supervisor are covered.

Foreign marketing newsreel. Color, released 1962, TV, 13¼ minutes.

A trip around the world for a colorful, lively look at American agricultural products on the move. You'll see how and why our farm products are finding large markets and making big news in the intensely competitive world of the 1960's. From cotton in Canada to coffee in Brazil and a market place in Nigeria, you will see the agricultural attache helping American farmers and industry reach their customers.

The good egg. B/w, released 1955, TV, 6½ minutes.

A magic show, in which the magician is narrator, furnishes the device by which the maximum number of attractive ways of preparing eggs is presented in the shortest time. Animation and live action shows the nutritive value of eggs, basic egg dishes, and ways in which eggs are combined with other foods.

Handling fruits and vegetables in wholesale warehouses. Color, released 1961, TV, 24¾ minutes.

Demonstrates efficient materials-handling systems and warehouse designs for wholesale distributors of fresh fruits and vegetables. Five systems for receiving and storing, three for assembly and truck loading are presented. Low-cost handling methods are described for a variety used types of

Price includes cassette.

An explanation of why the fuel needs of the farmer are so critical and so important to you. It explains why the farmer needs to be first in line at the fuel pump.

The peaceful revolutionists. C-191. Released 1973. 195 frames. Slide set \$50.00. Filmstrip \$20.00. Price includes cassette.

Discusses food prices, living standards, and tells what took place in agriculture and related fields over the past 25 years to produce a revolution that has freed the American public from the need to grow its own food.

Energy: Use it wisely around the home.

C-199. Released 1975. 69 frames. Slide set \$18.50. Filmstrip \$11.50. Price includes cassette.

Many handy tips on how energy used to heat, cool, cook, and clean the home can be used more efficiently.

Home canning—do it safely. C-200 Released 1975. 75 frames. Slide set \$18.50. Filmstrip \$11.50.

Gives step-by-step procedures for home canning of fruits and vegetables.

Agriculture and the changing environment. C-168. Released 1970. 78 frames. Slide set \$20.50. Filmstrip \$11.50. Price includes cassette.

Illustrates attacks on our environment and tells what we are doing to correct the situation.

Consider the soil first. C-183. Released 1971. 71 frames. Slide set \$18.50. Filmstrip \$10.50. Price includes cassette.

Shows how landowners and planning groups can use USDA soil surveys to avoid costly misuses of land in building homes, highways, subdivisions, and towns.

The effects of air pollution on plant life.

A-58. Released 1972. 105 frames. Slide set \$18.50.

Shows effects of air pollution on vegetables, fruits, field crops, ornamental plants, and trees.

materials-handling equipment. Sound management practices and efficient warehouse design are described and illustrated.

Helicopters in fire control. Color, released 1960, TV, 13 minutes,

A training film for supervisory personnel and fire staffmen service-wide, and for other cooperating agencies. The small helicopter has demonstrated a wide utility in fire control. The film shows the various ways in which it has proved valuable and how its use must be wisely managed by personnel and coordinated with other air and ground equipment.

Market cattle testing for brucellosis.

Color, released 1962, TV, 11 minutes.

A description of the Market Cattle Testing program in the language of the cattleman. Discussion by two cattlemen points out that MCT is the useful method for initially certifying and re-certifying "Modified Certified Brucellosis Areas" and that the program makes on-the-ranch testing unnecessary in 95 percent of the herds of cattle. Photographed on the colorful range lands of eastern Wyoming.

Marketing research pays off. Color, released 1959, TV, 12½ minutes.

Agricultural marketing research—research that saves many millions of dollars a year in costs of marketing farm products—is the theme of this picture. Shows USDA scientists at work improving marketing methods, reducing, processing and handling costs, expanding markets for farm products, and providing a better living for Americans. Resulting savings are many times the cost of the entire research program.

PUBLICATIONS RECEIVED DURING MAY-JUNE

BULLETIN OF THE MONTH

Food for the family—a cost-saving plan **Home and Garden Bulletin No. 209**

This publication is designed especially for families who want to follow the USDA low-cost food plan. Guides for planning well-balanced meals at low cost are included, along with information on food shopping and preparation. Sample menus are shown for the food manager with little time for food preparation as well as for the food manager who has considerable time for and interest in cooking. Tested recipes for some foods in the sample menus are included.

NOTE: Single copies of publications other than those listed **FOR SALE ONLY** may be obtained free as long as the supply permits from the Office of Communication, U.S. Department of Agriculture, Washington, D.C. 20250. Prices are given for the convenience of persons desiring to purchase these publications in quantities and for those who make frequent purchases of government publications. Remittances should be sent to the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402, except as otherwise noted.

HOME AND GARDEN BULLETINS

A guide to budgeting for the family. (G 108) 14 p. 35¢.

This revised bulletin provides a simple step-by-step guide that families can follow in setting up and using a budget. It also includes helpful information on the use of consumer credit.

Trees for shade & beauty, their selection and care. (G 117) 8 p. 25¢.

This slightly revised bulletin tells how to select trees for beautification of homes and streets and how to plant trees and care for them. It suggests how civic groups can take community action to replace lost shade trees.

Controlling fleas. (G 121) 6 p. 35¢.

Fleas often breed in large numbers where pets and livestock are kept. They spread through homes, buildings, and yards. They attack pets, livestock, poultry, and people. This slightly revised publication tells the common kinds of fleas, their development, and how to control them with insecticides.

Food for the family—a cost-saving plan. (G 209) 22 p. 45¢.

See Bulletin of the Month

LEAFLETS

Why fruit trees fail to bear. (L 172) Folder. 35¢.

Healthy trees produce good quality fruit. Weak or diseased trees produce fruit of poor quality or no fruit at all. The first step in fruit production is to keep your fruit trees healthy. This slight revision discusses tree health, climate and weather and the effect of pollination on fruit trees.

Replenishing underground water supplies on the farm. (L 452) 8 p. 35¢.

Beneath the surface of the ground are water basins with unused storage capacity far in excess of the largest surface reservoirs. In many localities, farmers who irrigate can use these underground reservoirs as supple-

ments to ponds and other surface basins by storing water in them for later use. This slightly revised bulletin discusses five methods by which water can be deposited in the underground basins—the basin, furrow, flooding, shaft or pit, and injection-wells methods.

Raising guinea fowl. (L 519) 8 p. 35¢.

This revised Leaflet discusses the care and rearing of guinea fowl, with emphasis on production, management, rearing, and marketing.

UNITED STATES DEPARTMENT OF AGRICULTURE
OFFICE OF COMMUNICATION

NOVEMBER 1976

PUBLICATIONS RECEIVED DURING SEPTEMBER-OCTOBER

BULLETIN OF THE MONTH

Aunt Sammy's radio recipes
Home and Garden Bulletin No. 215

This new bulletin brings together recipes from the 1927 edition of "Aunt Sammy's Radio Recipes," and some other favorites from current USDA publications. The character of Aunt Sammy—wife of Uncle Sam—was created by the former USDA Bureau of Home Economics and the Radio Service. By 1932, stations throughout the United States were broadcasting Aunt Sammy's show and listeners wrote for copies of the recipes. The Agricultural Research Service has brought back a condensed version of the cookbook. Current recipes emphasize time-saving techniques, money-saving ingredients, and good nutrition. All of the recipes have been kitchen tested and found acceptable by taste panels.

NOTE: Single copies of publications other than those listed for sale only may be obtained free as long as the supply permits from the Office of Communication, U.S. Department of Agriculture, Washington, D.C. 20250. Prices are given for the convenience of persons desiring to purchase these publications in quantities and for those who make frequent purchases of government publications. Remittances should be sent to the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402, except as otherwise noted.

FARMERS' BULLETINS

Johnsongrass . . . as a weed. (F 1537) 18 p.

This slight revision explains ways to control Johnsongrass, one of the ten worst weeds in the world. Detailed instructions are given for cultural control such as crop rotation, fallow plowing or disking, pasturing and mowing.

Poison ivy, poison oak, and poison sumac: Identification, precautions, eradication. (F 1972) 16 p. 35¢.

This slightly revised bulletin discusses the various kinds of poison ivy, poison oak, and poison sumac; precautions against and treatment for these poisons; and ways to eradicate the plants.

HOME AND GARDEN BULLETINS

How to prevent and remove mildew, home methods. (G 68) 14 p. 35¢.

This revision tells homemakers how to protect clothing and household items against mildew by keeping them clean, getting rid of dampness and musty odors, and by giving special care to some articles and surfaces. It also gives instructions on removing mildew.

Conserving the nutritive values in foods. (G 90) 16 p. 25¢.

This slightly revised bulletin discusses the factors that affect the nutritive value of foods. Helpful information is given on how to select, trim, store, cook, and reheat vegetables; how to retain nutritive value in fruit and fruit juices; effects of storage on canned fruits, vegetables, and meats; and how to be vitamin-wise when you select vegetables.

Cheese in family meals: A guide for consumers. (G 112) 30 p. 35¢.

This slightly revised bulletin gives tips on choosing cheeses to suit the needs of the consumer; a guide to storing cheese at home; suggestions for serving as a snack or dessert; pointers on cooking; and a comprehensive collection of recipes using cheese in family meals.

Water on the fire. 1952. 27 min, 16mm film.

Demonstrates effective and economical ways to use water in extinguishing various

types of burning fuels in the forest of the Eastern United States.

Men, women and children: 1954. 27 min, 16mm film.

Shows how the everyday unsafe habits of kindly people can cause devastating forest fires through negligence and thoughtfulness. They didn't mean to start a forest fire. Safe habits in forests are emphasized.

Longer life for wood. 1954. 17 min, 16mm film.

Designed to show the average user of wood the economic advantages of using treated wood in places where decay is likely to occur. Shows the value of good construction, and how improper construction can lead to early decay in wood. Portrays treatment of wood with preservatives in commercial treating plants, as well as home treatments on the farm and in the city.

The forest. 1960. 29 min, 16mm film.

Shows that natural forests are valuable for water conservation, timber, forage and recreation. Depicts trail riding, skiing and picnicking. Uses little narration. Music is by the Air Force Symphony Orchestra.

Helicopters in fire control. 1960. 13 min, 16mm film.

The small helicopter has demonstrated a wide utility in fire control. Shows the various ways in which it has proved valuable and how its use must be wisely managed with other air and ground equipment.

BULLETIN OF THE MONTH

Food is more than just something to eat
Home and Garden Bulletin No. 216

A nutrition guidebook for consumers which was originally prepared by the U.S. Department of Agriculture and the U.S. Department of Health, Education, and Welfare in cooperation with the Grocery Manufacturers of America and the Advertising Council. This booklet contains the major nutrients and where to find them, nutrients and energy, food for all ages, nutritional labeling, a daily food guide, the value of processed foods, and tells the many ways of eating.

NOTE: Single copies of publications other than those listed **FOR SALE ONLY** may be obtained free as long as the supply permits from the Office of Communication, U.S. Department of Agriculture, Washington, D.C. 20250. Prices are given for the convenience of persons desiring to purchase these publications in quantities and for those who make frequent purchases of government publications. Remittances should be sent to the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402, except as otherwise noted.

FARMERS' BULLETINS

Inspecting and cleaning subsurface drain systems.
(F 2258) 16 p. 35¢.

This slight revision describes recently developed methods for cleaning subsurface drains, making it possible to clean extensive drain systems effectively, rapidly, and economically. These methods will allow a farmer to clean his drains many times if necessary, rather than install a new system. The main points discussed are causes of drain failures, inspection, excavation, and methods of cleaning drain systems.

HOME AND GARDEN BULLETINS

Removing stains from fabrics. (G 62) 26 p. 40¢.

This revised publication contains instructions for removing most stains at home. It tells what to do immediately when a stain occurs and what follow-up steps to take. Most stains are classified into nine groups. Separate procedures for treating stains in the nine groups as well as for stains that do not fall into the nine groups are given. There is also a method given for treating unknown stains.

Growing chrysanthemums in the home garden. (G 65) 8 p. 35¢.

This revised bulletin tells how chrysanthemums can bring a variety of bold colors to your garden from mid-July until killing frost. Flowers may be shades of yellow, orange, red, purple, bronze, pink, or white. They range in form and size from clusters of small, round pompons to individual 4-inch decoratives. The plants are easy to grow and can be grown throughout the United States.

How to buy lawn seed. (G 169) Folder. 35¢.

This slightly revised bulletin gives factors to consider before buying lawn

seed, and a brief description of the most frequently used lawn seeds. It also tells the reader things to look for on labels of lawnseed packages. Labels should identify kinds of seed in a mixture, state the percentage of the seed variety, percentage of seed expected to produce normal plants, and percentage of weed seed.

Your money's worth in foods. (G 183) 28 p. 60¢.

This revised bulletin provides the homemaker with basic information essential to planning and purchasing food for good nutrition. It tells how to plan well-balanced meals within various food budgets and suggests reasonable amounts to spend for food. The bulletin also provides meal planning guides, food shopping tips, and tools for comparing costs of food.

Food is more than just something to eat. (G 216) 28 p. 80¢.

See Bulletin of the Month.

LEAFLETS

The old house borer. (L 501) 6 p. 35¢.

The old house borer can cause severe damage to buildings in the Eastern United States. This revised leaflet describes the different stages the insect passes through during its life, physical characteristics of the insect, where it lays its eggs, how much damage it can cause, and measures that can be taken to control infestation.

Rhubarb production. (L 555) 8 p. 35¢.

This slightly revised leaflet describes soils, method of planting, varieties, and cultivation of rhubarb produced outdoors, and the forcing of rhubarb grown in the winter. It discusses field production, structures, crowns for the forcing house, temperatures, and harvesting in connection with indoor production. It also examines briefly the adaptation of principles of indoor production to production of a few plants in the home.

Coaching on the job. 1964. 25 min, 16mm film, optical sd, col.

Approximately 80 percent of Forest Service training is done on the job. This film explains the importance of this training in typical on-the-job sequences filmed in the field.

Direct seeding of Southern pine. 1965. 20 min. 16mm film, optic l sd, col.

The research leading to the successful direct seeding of Southern timberlands is fascinating. At first, birds and rodents ate the seeds, methods of seeding were crude, but important breakthroughs in research solved these problems.

Forest in a museum. 1962. 11 min. 16mm film, optical sd, col.

Features the 1¼-acre 'Beaver National Forest' Exposition Ranch Museum in New Mexico. Tells the story of multiple use through small-scale models of animals, people, and fire tower, with real trees, grass and water. Living animals and birds on exhibit at the Museum are shown also.

Islands of green. 1965. 24 min. 16mm film, optical sd, col.

Sixty years ago, conservationists set aside the National Forests as large islands of green for the American people. Today, increasing pressure for outdoor recreation and conservation education have created a need for small islands of green near urban communities. The National Audubon Society is prepared to assist any community in a plan for a nature conservation center.
